PROFESSIONAL SUMMARY

AI & Machine Learning graduate with practical experience in Python, Machine Learning, NLP, and Deep Learning. Developed AI chatbots and computer vision applications using modern frameworks and cloud technologies. Seeking entry-level opportunities as a Software Engineer, AI/ML Engineer, or Python Developer to build innovative and scalable solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, Node.js

AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, TensorFlow, Keras, OpenCV, Hugging Face

Web: HTML5, CSS3, React.js, Django, REST APIs

Cloud & DevOps: AWS, Git, GitHub

Tools: Power BI, Telegram Bot API, Gemini API, OpenAI API, MySQL

EDUCATION

B.Tech – AI & Machine Learning | GPA: 7.16 — Nov 2021 – May 2025
Swarnandhra Institute of Engineering and Technology

Intermediate (MPC) | GPA: 9.0 — Jun 2019 – May 2021
Sai Deepthi Junior College

SSC | GPA: 10.0 — Jun 2018 – May 2019
Deepthi E.M High School

INTERNSHIP EXPERIENCE

Machine Learning Intern | *Indian Servers* — Jun 2023 – Jul 2023

- Engineered an NLP-based Q&A chatbot using Python, Hugging Face Transformers, and the OpenAI API, deployed via the Telegram Bot API, reducing manual query response time by 40%.
- Delivered the solution within a 2-month timeline by collaborating with stakeholders to define chatbot requirements and communication strategies.

Artificial Intelligence Intern | *AIMER Society* — Jan 2024 – Feb 2024

- Trained AI models for computer vision, medical image analysis, and NLP tasks using Python and deep learning frameworks, improving model accuracy by 15%.
- Built and deployed 5+ interactive Power BI dashboards leveraging LLMs, enabling leadership teams to identify key business insights and drive data-driven decision-making.

PROJECTS

Crop Stress Detection Using Deep Learning | *Python, TensorFlow, Keras, OpenCV, Django*

- Built a CNN-based model to detect rice crop diseases from images, achieving a 20% improvement in prediction accuracy. Developed and deployed a real-time Django web application for disease prediction and testing.
- Managed the complete project lifecycle, including data collection, model training, evaluation, and deployment.

Real-Time Traffic Sign Detection | *Python, YOLOv8, OpenCV*

- Developed a real-time traffic sign detection system using YOLOv8 and OpenCV, classifying 40+ traffic sign categories with 92% accuracy.
- Optimized image processing and object detection performance for real-time inference.

Conversational Telegram Bot | *Python, Gemini API, Telegram Bot API*

- Developed an AI-powered Telegram chatbot integrated with the Gemini API, handling 200+ automated user interactions per testing cycle.
- Implemented NLP-based conversation handling and automated query resolution.

Global Internet Usage Dashboard | *Power BI*

- Designed an interactive Power BI dashboard featuring KPIs and visual analytics, reducing data review time by 30% across 50+ countries.
- Created actionable insights through data visualization and trend analysis.

CERTIFICATIONS

- Machine Learning Internship Certificate – AIMER Society
- Artificial Intelligence Internship Certificate – Indian Servers
- Python Programming Certification – AP-SSDC
